

Mena - Aspiring Paramedic

Hi, my name is Mena. I'm in Year 11 and I'm a Stuartholme Boarder. When I graduate, I'd like to attend QUT and study Paramedic Science because I want to save people's lives. The moment I decided that I wanted to train to become a Paramedic was during my Biology class. My teacher was teaching me about the human body and I was very interested and I loved the idea that I'd get to help people and help save their lives.

Being active is very important to me and Stuartholme gives me the opportunity to play a variety of sports such as netball, touch, athletics and cross country. I also do netball outside of school and I'm currently in the under sixteens and under eighteens indigenous Australian teams.

There have been many teachers that have guided me throughout my time here at Stuartholme. But there was one in particular, which was Mrs McMain. She gave me the opportunity to go to trial for the indigenous Australian team and I got in.

One of my favourite Stuartholme moments is athletics day. I love cheering my house, cheering for my friends and doing my house proud.

The best part about being a Boarder is that I get to be around my friends and they're always there for me and they're like a second family to me.
